

**Student Engineer & Founder** building autonomous AI agent workflows and production-grade LLM applications. Currently pursuing B.Tech in CSE (AI) at **Malla Reddy Vishwavidyapeeth × NIAT** with deep hands-on expertise in multi-agent orchestration, contextual retrieval (RAG), and client software delivery.

01. PRACTICAL EXPERIENCE

Founder & Lead Architect

Smart Connect AI

Startup · Ongoing

2026 — Present

Architected and launched an intelligent multi-agent platform powered by modern LLMs. Designed autonomous agent workflows, integrated semantic knowledge retrieval (RAG), and deployed tool-invocation pipelines automating client engagement and data tasks.

Lead Web Engineer

RK Deep Cleaning Services

Client Delivery

2025 — 2026

Commissioned to engineer and deploy the official business web platform. Designed mobile-first responsive architecture, interactive service estimation algorithms, fast asset delivery, and managed client delivery end-to-end to custom domain production.

02. SELECTED PROJECTS

Smart Connect AI

★ Flagship

Multi-agent system with context-aware semantic retrieval, automated workflow routing, and session memory.

LLMs Agents Python RAG

RK Deep Cleaning

• Live

Full commercial booking platform featuring dynamic quote estimation and high-performance UI delivery.

HTML/CSS React Vite Tailwind

Aura AI

Context-aware conversational AI assistant featuring adaptive system prompting and session state management.

LLM Systems Python Prompt Eng

TruthLens

AI-assisted media credibility analysis tool evaluating source reliability with semantic validation.

NLP Vector Search Python

SIH Hackathon Project

National hackathon engineering prototype tackling real-world problem statements under high pressure.

Architecture Team Lead AI

Audit Flow

Automated workflow tool for structured data validation, schema compliance, and audit trail generation.

SQL Python Automation

03. EDUCATION

B.Tech — CSE (Artificial Intelligence)

Malla Reddy Vishwavidyapeeth × NIAT

2nd Year · Ongoing (Hyderabad, India)

04. TECHNICAL SKILLS

AI & LLM SYSTEMS

LLM Systems (85%)

AI Agents (85%)

Generative AI

Text Embeddings

Semantic Search

Vector Search

RAG

Prompt Engineering

SOFTWARE ENGINEERING

HTML / CSS (90%)

C++ (50%)

Python

TypeScript

React

Next.js

API Development

Full-Stack

DATABASES & TOOLING

SQL (75%)

MongoDB (70%)

Git / GitHub

Vite

Tailwind CSS

Netlify

05. ACHIEVEMENTS & HONORS

- Adobe University Hackathon — 2026 participant
- OpenAI Academy × NxtWave — Regional Buildathon (2025)
- Maker Conclave 2026 — Hardware & AI innovation
- Masterclass: Vector Search — Delivered by Amazon Applied Scientist
- Masterclass: Text Embeddings — Delivered by Flipkart Data Scientist
- Generative AI Mastery — NIAT Cohort
- Base44 Workshop — Hands-on app building
- Robotic Arms 101 — NIAT Robotics Team
- Smart India Hackathon (SIH) — National Participant
