PROFILE	Student engineer and founder building intelligent systems, autonomous AI agents, and practical LLM applications. Currently pursuing B.Tech in Computer Science & Engineering (AI) at Malla Reddy Vishwavidyapeeth × NIAT, with hands-on experience across LLMs, multi-agent architectures, full-stack software, and client delivery.
---------	--

EDUCATION	B.Tech — Computer Science & Engineering (AI) 2nd Year · Ongoing
	Malla Reddy Vishwavidyapeeth × NIAT

EXPERIENCE	Founder — Smart Connect AI Ongoing
	Startup · Intelligent Multi-Agent & LLM Platform
	Built and launched Smart Connect AI, an intelligent multi-agent platform. Designed system architecture, developed the full-stack application, and integrated AI-powered document analysis, contextual retrieval, and semantic matching for autonomous workflow automation.
	Client Project — RK Deep Cleaning Services Delivered
	Client Engagement · Full-Stack Software Delivery
	Commissioned to design and develop software for RK Deep Cleaning Services. Managed client requirements, mobile-first responsive architecture, interactive service estimation workflows, and end-to-end delivery independently.

SELECTED PROJECTS	Smart Connect AI Intelligent multi-agent platform with context-aware semantic retrieval, automated workflow routing, and conversational task management.	RK Deep Cleaning Services Commercial web portal featuring structured service booking, dynamic quote calculations, and optimized responsive performance.
	Aura AI Conversational AI application built on modern LLM frameworks with context-aware session management and custom prompting persona.	TruthLens Media credibility analysis tool using AI-assisted fact-checking heuristics and source reliability evaluation.
	Audit Flow Automated workflow tool for structured data auditing, schema validation, and audit trail generation.	SIH Hackathon Project National-level engineering hackathon project tackling real-world problem statements from ideation to working prototype under tight deadlines.

TECHNICAL SKILLS

AI / ML	Generative AI · LLM Systems · Text Embeddings · Semantic Search · Vector Search · Computer Vision · RAG · Autonomous Agents · Prompt Engineering
Software Eng.	Full-Stack Development · API Development · Automation · React · Next.js · TypeScript · Python · C++ · HTML / CSS
Databases & Tools	SQL · MongoDB · Git · GitHub · Vite · Tailwind CSS · Netlify · FastAPI

ACHIEVEMENTS & LEARNING

- Adobe University Hackathon — 2026
- Maker Conclave — 2026
- Applying Text Embeddings in LLM Systems (Flipkart)
- Base44 Hands-On App Building Workshop
- Smart India Hackathon (SIH) Participant
- OpenAI Academy × NxtWave Regional Buildathon — Telangana — 2025
- Generative AI Mastery Workshop — NIAT
- Vector Search in Practice: Semantic Search with LLMs (Amazon)
- Robotic Arms 101
