ACHIEVEMENTS

- > Adobe University Hackathon — 2026
- > OpenAI Academy × NxtWave Buildathon
- > Maker Conclave — 2026 Innovation
- > Vector Search Masterclass (Amazon)
- > Text Embeddings Masterclass (Flipkart)
- > Smart India Hackathon (SIH) Participant

Founder & Student Engineer developing practical AI agent frameworks and LLM systems. Enrolled in B.Tech CSE (AI) at **Malla Reddy Vishwavidyapeeth × NIAT**. Focused on context-aware retrieval (RAG), multi-agent task automation, and high-performance full-stack software delivery.

01. PRACTICAL EXPERIENCE

Founder & Lead Architect

Startup · Ongoing

Smart Connect AI — Multi-Agent & LLM Platform

2026 — Present

Architected and launched Smart Connect AI, an autonomous multi-agent platform powered by LLMs. Engineered prompt pipelines, tool invocation logic, contextual knowledge retrieval (RAG), and integrated vector embeddings to automate intelligent user workflows.

Lead Web Engineer

Client Delivery

RK Deep Cleaning Services — Commercial Platform

2025 — 2026

Commissioned to design and engineer the full commercial web platform for RK Deep Cleaning Services. Delivered mobile-first responsive architecture, interactive quote calculation algorithms, fast loading static assets, and end-to-end custom domain deployment.

02. SELECTED PROJECTS

Smart Connect AI

★ Flagship

Multi-agent system with semantic search, automated routing, and session state memory.

LLMs Agents Python RAG

RK Deep Cleaning

• Client Live

Commercial booking web portal with dynamic quote estimation and responsive UI delivery.

HTML/CSS React Vite Netlify

Aura AI

Assistant

Context-aware conversational assistant built on LLM architectures with session management.

LLM Systems Python Prompt Eng

TruthLens

Analysis

Media credibility analysis tool evaluating source reliability and fact-checking heuristics.

NLP Vector Search Embeddings

SIH Hackathon Project

Hackathon

National engineering hackathon prototype solving real-world challenges under tight deadlines.

System Design AI Prototype

Team Lead

Audit Flow

Workflow

Workflow utility for automated data validation, schema checking, and audit report generation.

SQL Python Automation

03. CORE COMPETENCIES

AI & Machine Learning: Large Language Models, Autonomous AI Agents, RAG Pipelines, Text Embeddings, Vector Search, Semantic Search, Computer Vision, Prompt Engineering.

Software Engineering: HTML/CSS (90%), C++ (50%), Python, TypeScript, React, Next.js, API Design, System Architecture.

Databases & Tooling: SQL (75%), MongoDB (70%), Git, GitHub, Vite, Tailwind CSS, Netlify, Linux.
